

Harvard Apparatus, Inc. Acquires Hugo Sachs Elektronik

Harvard Apparatus, Inc. of Holliston, Massachusetts USA, announces the acquisition of Hugo Sachs Elektronik of March - Hugstetten, Germany.

Hugo Sachs, founded in 1960, is the market leader in the design, manufacture and distribution of perfusion systems including associated hardware and software products primarily used in pharmacology, cardiology and physiology for the testing of new drugs.

This acquisition strengthens HAI's position in this very important area of drug development. In addition, the strong market position of Hugo Sachs in Germany will provide an excellent channel for the distribution of all of HAI's products. Likewise HAI's strong market position in the US will strengthen Hugo Sachs' position in that market. The Hugo Sachs products will be included in the new HAI catalog, which is due to be released in March.

Hugo Sachs will continue to operate out of its current facility in March - Hugstetten, Germany and will trade under the name of Hugo Sachs Elektronik - Harvard Apparatus GmbH.

Harvard Apparatus designs, manufactures and distributes a broad range of products used in new drug development including technologies for molecular, cellular, tissue and in-vivo research.
